

CORN

PRODUCTS AND TANK MIXES Continued

Table with columns: Chemical group, Application timing, and various weed categories (barnyard grass, foxtail, grassy weeds, broadleaf weeds, perennial weeds, etc.)

Control rating: 9 = > 90 percent control, 8 = 80 to 90 percent control, 5, 6, 7 = 50 to 80 percent control. This table is presented as a guide only. It is strongly recommended that users refer to OMAFRA Publication 75 and product labels...

# WEED CONTROL GUIDE 2010

Chemical group	Application timing				Grassy weeds								Broadleaf weeds								Perennial weeds											
	Pre-plant*	Burndown** + residual	Pre-emergence	Early post-emergence	Late post-emergence	barnyard grass	crabgrass	fall panicum	foxtail, green	foxtail, yellow	old witchgrass (A)	proso millet	duckweed, wild	cockspur	freestone, Canada	lady's thumb	lamb's quarters (A)	mustards (A)	nightsades (B)	pigweeds (A, B)	ragweed, common (A)	ragweed, giant	velvetleaf	bindweed	field horsetail	milkweed	nutsedge	quackgrass	sowthistle	thisle, Canada

For most products, ratings for pre-plant, incorporated, and pre-plant surface applied are the same. For a few products ratings may change slightly between treatments. Check Publication 75 for details.

RR = Roundup Ready corn only.

\*\*\* Most annual weeds will be controlled if emerged.

Red type: Herbicide tolerant varieties only.

From OMAFRA Publication 75 guide to weed control, copyright © Queen's Printer for Ontario, 2010. Reproduced with permission.

Insufficient data available to provide control rating.

Optimum growth stages for best control of these weeds will not likely be attained prior to planting in early to mid-spring.

Use post-timing for optimum control.

Magazine-resistant biotypes exist.

Roundup Ready corn only.

Pre-plant incorporated rating. May differ from that shown.

From OMAFRA Publication 75 guide to weed control, copyright © Queen's Printer for Ontario, 2010. Reproduced with permission.

Control rating: 9 = > 90 percent control, 8 = 80 to 90 percent control, 5, 6, 7 = 50 to 80 percent control

This table is presented as a guide only. It is strongly recommended that users refer to OMAFRA Publication 75 and product labels. Performance of some products on certain weeds may vary according to application timing. Some tank-mixes may have higher ratings on some weeds than shown, especially if various timings are recommended. Various formulations may be available and additional application rates may be recommended. Check Publication 75 or product labels for details.
